

Juan Becerra – Software Engineer, Game Developer

becerrajuan007@gmail.com | (208) 550-9191 | Seattle, WA | [Portfolio Website](#)

WORK EXPERIENCE

Electronic Arts - Lifestyle

2025 – Present

Software Engineer - Tools and Tech-Art

Kirkland, WA

- Implemented a project-agnostic animation stylization tool in Maya/Python that cut down redundant animation workflows by over 70%.
- Created an Unreal Engine plugin that exports in-game character trajectory data to be used when developing assets for motion-matching animation databases.
- Helped prototype several genAI/ML-focused content development projects, particularly focused on rapid, non-artistically intrusive tools that could be used across different projects at EA.

Electronic Arts - Maxis Studios

2021 - 2025

Software Engineer - Gameplay and Animation

Seattle, WA (Remote)

- Contributed to the pre-production of Project Rene, an upcoming Sims experience built in Unreal Engine 5.
- Architected an async path-planning API for character routing, locomotion, and navigation events.
- Implemented several animation features, including tuning tools, event systems, IK, and motion-matching.
- Worked closely with simulation/experience-design teams to ensure smooth and well-prioritized development.

Lionbridge

2020 - 2021

Senior Games Test Engineer

Boise, ID

- Led a small team of QA testers at an outsourced functional and localization testing firm.
- Worked with external studios to provide detailed bug reports in JIRA for large live-service games.
- Provided additional insights on existing bug reports using previous knowledge of game programming.

TurnUp

2020

Software Engineer Intern - Full Stack

Boise, ID (Remote)

- Contributed to TurnUp, a non-profit web/mobile platform for youth-led activism and networking.
- Headed the implementation of event posting, RSVP, and notification systems.

Boise State University - Department of Computer Science

2020

Undergraduate Research Assistant

Boise, ID

- Developed a distributed content production pipeline for Boise State University's "World Museum" project.
- Researched and implemented computer imaging processing and compression algorithms to develop web-based digital asset management software.

Boise State University - Advising and Academic Support Center

2019 - 2020

Computer Science Learning Assistant

Boise, ID

- Assisted in courses on data structures and algorithms, including grading and tutoring sessions.
- Refactored the auto-grading system for the new online summer curriculum.

SKILLS

- **Languages:** C++, C#, Python, Rust, GLSL/HLSL, Java, JavaScript, SQL
- **Engineering Skills:** Gameplay, Animation, Simulation, Engine, Graphics, Designer Tools, Tech-Art
- **Technologies:** Unreal Engine, Unity, Godot, Maya, Vulkan, WPF, MySQL, Git, Perforce, Bash, Docker, AWS

EDUCATION

Boise State University

2021

Bachelor of Science, Computer Science

Boise, ID
